TECHNICAL CONTENT PORTFOLIO

Miroslawa Chatys

Cybersecurity education / Visual communication / Technical documentation

SELECTED WORK

01 SOC Made Simple #7 - Log Analysis

Beginner-friendly visual cybersecurity learning series

02 Phishing - Be Aware. Stay Safe.

Security awareness newsletter and visual learning aid

03 Failed Login Investigation CTF

GitHub documentation reviewed with OpenAI Codex

ABOUT

I create accessible cybersecurity learning materials and document practical SOC and CTF projects. My background combines visual design with hands-on security learning and clear technical communication.

01 / VISUAL TECHNICAL EDUCATION

SOC Made Simple #7

An ongoing LinkedIn learning series designed to make SOC concepts clearer for beginners through short explanations, examples and visuals.

TOPIC

Log analysis: events, patterns and context

MY CONTRIBUTION

Topic selection, learning direction, visual content and publication.
Published on LinkedIn: 1,672 impressions and 15 reactions (snapshot).

Source: LinkedIn post screenshot. Original six-page PDF not available.

Phishing awareness newsletter

A concise awareness resource explaining phishing, warning signs and a practical three-step response: Stop, Check, Report.

MY CONTRIBUTION

Content direction, visual presentation and final published resource.

CTF documentation + Codex

Failed Login Investigation CTF: a beginner SOC exercise using authentication logs, Docker and a documented investigation scenario.

WORKFLOW

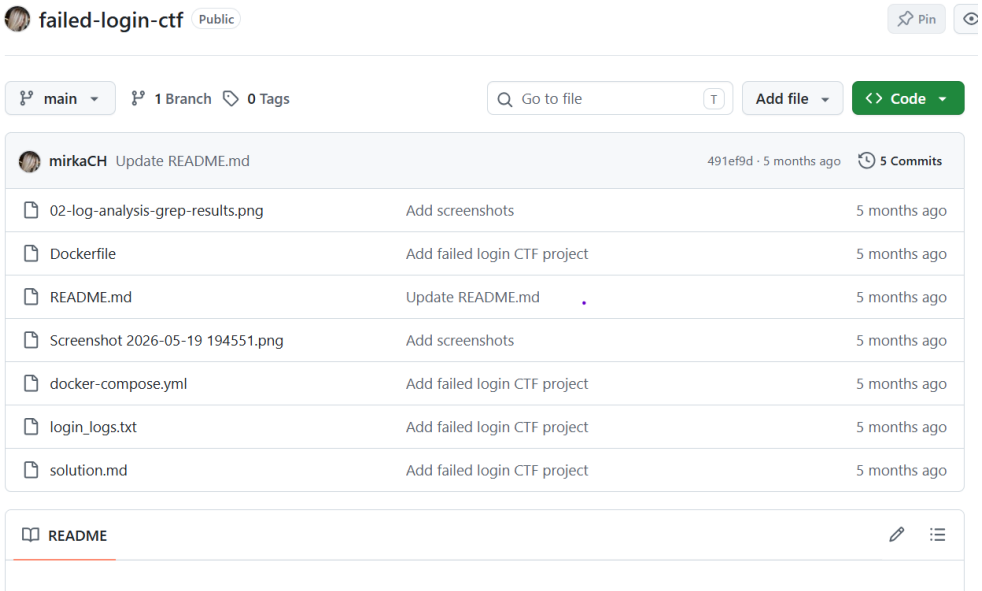

Used OpenAI Codex to review README structure, Docker commands, screenshot references and Compose configuration.

VERIFIED OUTCOME

Codex reported a successful Compose validation and suitable local Docker instructions. I corrected the README screenshot file references and committed the update manually on GitHub.
